

Risk Management Grid

This grid is a tool you can use to assess and prioritize potential impacts on your event. Describe the event, and place it on the grid. “Red” zone issues need to be addressed first, while “greens” can be left last. This is a good activity to undertake with your core team – use your past experience and brainstorm different possibilities.

Likelihood of Event Happening	Status of Risk		Risk Class		
			Low	Medium	High
	5	Has already happened			
	4	Will happen			
	3	Could possibly happen			
	2	Might happen			
	1	Unlikely to happen
