

EUROFINS SAFER@WORK LIVE EVENT TEST PROGRAM OPTIONS

GOAL: MAXIMIZE PARTICIPATION

-21 DAYS

AT-HOME PCR SELF-SAMPLE

Test attendees who report they are immunocompromised

-14 DAYS

AT-HOME PCR SELF-SAMPLE

Test all attendees to meet CDC time-based requirements to avoid contagious contact - eliminates the persistent positive dilemma*

-3 DAYS

AT-HOME PCR SELF-SAMPLE

Test all attendees to identify infections that might have occurred after day -14 testing

UPON ARRIVAL • BEFORE DEPARTURE • ONGOING

Perform on-site daily testing

COVID-19 is contagious for 7-21 days depending on severity of disease and immune system status.

GOAL: MAXIMIZE VALUE

**AT-HOME PCR SELF-SAMPLE
-3 DAYS**

POSITIVE TEST RESULT: ATTENDEE SHOULD AVOID EVENT, STAY HOME, AND FOLLOW CDC GUIDELINES

NEGATIVE TEST RESULT

PLUS, TEST DAILY THROUGHOUT EVENT IN ADDITION TO OTHER SAFETY PROTOCOLS

GOAL: MINIMIZE COST

Talk to your venue to determine what safety measures they're taking to ensure safer premises for your event, such as surface testing, air testing or testing employees who will support your event.

TEST DAY OF ARRIVAL IN ADDITION TO OTHER SAFETY PROTOCOLS

TEST DAY OF DEPARTURE IN ADDITION TO OTHER SAFETY PROTOCOLS

Eurofins provides consulting and site safety services that can be customized to any event, including participant logistics, sanitation verification, and testing protocols.

POST-EVENT SCREENING

+5 DAYS

AT-HOME PCR SELF-SAMPLE

POSITIVE

ATTENDEE SHOULD FOLLOW CDC GUIDELINES, REPORT RESULT TO EVENT HOST

NEGATIVE

CONTINUE FOLLOWING COVID-19 SAFETY GUIDELINES

*Persistent Positive Dilemma - PCR test detects infection, but it's unknown whether they were positive and asymptomatic 3 weeks or 3 days ago. By testing at either day -21 or -14 days (depending on immune system status - normal vs suppressed), you can be sure they are meeting time-based CDC guidance to ensure they are not contagious on the event date. Ultimately, this decreases unnecessary exclusion.
